About This Game

Just when you thought it was safe to eat chicken again, the chickens have returned with an organized invasion to take over the entire solar system! Journey to each planet and fight your way through to save the world (again)!

In the first chapter of the Chicken Invaders saga, you defended Earth against an invasion of intergalactic chickens seeking revenge for the oppression of their earthly brethren. However, as you were clearing out the last of the chicken invaders and were looking forward to a double chicken burger special at the space burger bar, the true scale of the problem became apparent: the first invasion was simply a precursor to the chicken's main assault! Their master plan now becomes clear: to invade each planet in the solar system and make sure that it is inhabited exclusively by chickens!

The time has now come to don your egg-repulsing helmet and make the biggest omelette you've ever made as you continue your adventure in the second chapter of Chicken Invaders: The Next Wave. Only you can make a difference. Will you succeed? Will the future of chicken burgers be secure? Or will you end up as part of the menu in a galactic chicken restaurant?

It's a great game, but don't get it. There's a bug that causes the game to crash out because it can't play the cut scene at the end of level 12. I've contacted them for help but nobody ever responds.

Do buy it if you're happy to only play the first 11 levels and not actually finish the game.. this is a short game just to find objects, my daughter and i enjoyed it :). It doesn't seem to load for me. I was really exited when afterbirth+ came out and i have been saving up for it. A real dissapointment. Any tips on how to load this game and to keep it from crashing please. It would be a real help.. Hell bids you enter. Victory may come slowly, painfully... Or perhaps not at all. But seek this despair, and you will be rewarded....

Zenodyne R is ruthless and unforgiving, but the satisfaction of beating cruel and heartless levels will leave you hungering for more.

9/10

-Rayne. Unlike some people that say there are no servers there are 2 CA servers for usa and 2 servers for china under official. You may have to hit refresh before they show up. The game is not your normal survival game and you can tell its very early into the development. The guy making the game is not someone that speaks english and uses steam translation forums for the translations so hes not at fault for the translations being bad. The game is a bit empty at the moment but its only been 1 day and Yes it does need work but feed back will bring changes to make the game better. If you want to support someone thats putting everything he has into what hes working on help the guy out and buy the game. Then watch it grow. A tree starts as a seed and cant grow without water. Your support is the water. Now we just need to find out what kind of tree this will be.

Better than Season 8. over all the game is good. This game isn't quite sure what it is. RPG and wargame... It tries to be similar to the Total War franchise in regards to its combat. Unfortunately, a number of the units are unbalanced, and so the combat can take a lot longer than it should. It adds spells, which I found to be an annoyance, as my archers were always literal lightning rods. The overarching strategy seemed deficient as well, as there aren't many ways to get gold so tech, infrastructure and army all suffer. It also limits the number of armies that you can have roaming around, so wandering armies just take over buildings of mine, which admittedly didn't seem to affect me at all.

As far as the RPG factor goes, it again struggles. For some reason the player is fighting Irish demons. You don't get to see or use King Arthur, and end up killing multiple knights of the round table. Other knights don't even appear, which would be understandable for most, but they cut out Gawain, and left in Agravain? A lot of the leveling really didn't feel like it mattered for heroes.

Overall, depending on what you want there are games which do what this game does, only much better. I can't recommend this game.. Really love it.

does a 'retro game' right. Fast gameplay, lots of personality and charm, good challenge, convincing and consistent graphic V style. Love the sub weapons (those green bombs man).

Going to see this one through that's for sure!

The english text in the game isn't written so well but you can understand it.

9 V 10. why doesnt it save my data this is stupid

. This game is pretty weird. It's also a lot of fun. It's fast paced. It's action. It's strategy. It's a puzzle game. And that's really all the words I have that I can use to describe this thing.

I suggest checking out the demo, especially if you are tired of 9 out of 10 indie strategy games being Tower Defense.. I've been searching for a tool to manipulate polygons, and I can't find anything better than this. This is after trying maya, mondo, and any other relevant software that is free or looks like it's aimed at poly shaping. I think I'm haivng trouble with naming files, but I might just have to read the manual.. Playing the HECK out of this game. Lots of fun for a RPG/Strategy game.

Advice: Archers with heros with hold, dragon breath, poison slow, lightning. Get itms that reduce cool down and give you mana per second and per kill and you will be UNSTOPABLE!

. please tell me how to start this game in 1920x1080p, i really want to play this games.. i highly recommend this game. This game is awesome! and terrifying. I have stopped and quit the game for like a couple days then keep going cuz i get so scaredXD especially on hard mode.
